Classic Blended Burger

Prep time: 15 minutes
Cook time: 10-15 minutes
Servings: 4

- **1/2 pound cremini or white button mushrooms**
- **3 tablespoons olive oil, divided**
- **1 pound ground beef**
- **1 teaspoon salt**
- **4 buns**

Finely dice mushrooms or gently pulse in food processor.

In skillet, warm 2 tablespoons olive oil on medium-high heat and add mushrooms, sauteing 5-7 minutes, or until golden brown. Remove from heat and cool 5 minutes.

Transfer cooled mushrooms to medium bowl. Add ground beef and salt, mixing until combined. Make 4 patties. Add remaining olive oil to pan and cook burger patties on medium-high heat until desired doneness. Plate and add desired toppings to bun.

Topping recommendations: feta cheese, romesco sauce, sweet peppers and sauteed red onions.

THE PERFECT BLEND

Blenditarian substitutions make dinnertime delicious

FAMILY FEATURES

Finding the right daily nutritional balance is no easy feat. Managing sugar, carbohydrate, fat and red meat intake takes serious effort and planning, but transforming your favorite recipes into more nutritious family meals may be easier than you realize.

Adopting the blenditarian lifestyle is a simple solution to healthier eating. It involves, simply, blending mushrooms into meat to make every day dishes more healthful and delicious. Adding chopped mushrooms to ground beef at a ratio of at least 25 percent mushrooms can enhance the taste of dishes, deliver an extra serving of vegetables and beneficial nutrients, and trim total calories and fat intake.

Any mushroom variety will work. Creminis and portabellas lend rich, earthy flavors to any meal, while white button mushrooms offer a more delicate taste. For the more adventurous eaters, maitake and shiitake varieties bring a bold woodsy taste and meaty texture to the plate.

The key to blending is developing the perfect mushroom consistency. For example, if using ground meat for tacos or burgers, chop mushrooms to mimic the familiar crumbled texture, using a knife and cutting board, food processor or vegetable chopper. For stews, halve or quarter mushrooms, or slice them to match strips of meat in fajitas or stir-fry.

Practice your blending technique with these recipes and find more deliciously blended dishes to share with your family at MushroomInfo.com.

People have been talking about the advantages of Electronic Health Records (EHR) for a long time.

But we did more than talk.

In 2003 we stayed true to our vision and invested in the tools and people to implement this game-changing technology. Today we are recognized as one of the first and most advanced users of an EHR system.

Exceptional health care starts with great doctors and nurses ... but it doesn't end there.

FOR THE RECORD

ARE YOU A METAL MOUTH?

Despite our best efforts, most patients in our practice have had at least one cavity and filling in their lives, and if you are in your thirties or older, there is a good chance that at least some of your flings were made of metal. Recently these fillings have become a controversial topic in the health press.

This material, known as "amalgam," is actually a combination of silver, tin, copper, zinc, and - at the top of the controversy - Mercury.

Many of us remember being introduced to mercury in an elementary school science class. As the only metal that is liquid at room temperature, it was always fun when the teacher showed us how an actual metal can flow inside a tube, but drop the tube or break a mercury filled thermometer and look out! As toxic poison it had to be cleaned up with extreme caution.

So if mercury is so dangerous, what the heck is it doing in your mouth? While metal amalgam fillings do give off small amounts of mercury vapor, most researchers, including The American Dental Association Council On Scientific Affairs, have concluded that unless there is a specific allergy these types of fillings pose on personal health risk. But visit our office today and you will find that we recommend doing "fillings" (also known as "dental restorations") with other materials. Why? There are many reasons. Here are just a few.

1. BEAUTY. There is no doubt about it - silver fillings are not attractive. The modern materials we use these days are tooth colored ones, so only your dental team needs to know that your beautiful smile once contained a few cavities.
2. BONDING. While a traditional filling is simply wedged into your tooth, making it more prone to breakage, most of the more modern materials actually adhere to the tooth itself. In many cases this means that less healthy tooth need to be removed in order to perform a proper restoration, and these materials are less prone to "leaks" where decay and bacteria can easily form at the junction of the tooth and restoration.
3. EXPANSION and Contraction. Ever have trouble removing the lid on a jar? Run the lid under some hot water and it pops right off. Why? The heat causes the metal lid to expand slightly. Well, the same thing happens with an amalgam (metal) filling. And years of expansion and contraction from eating hot and cold food can damage the tooth and the restoration. Choose a more modern material and go have that ice cream and coffee. Yum!!

Any questions? at Rockton Dental Care your health and comfort come first! Feel free to give us a call at 815-624-2626 to schedule an appointment or to discuss any dental health matters

One way we can help each other get through these challenging times is to keep our dollars local. Here are three good reasons.

Reason #1: Shopping locally saves you gas and wear and tear on your vehicle.

Reason #2: When you spend your money locally, you support the businesses whose property taxes pay for our municipal services.

Reason #3: Many of our youth programs are supported and sponsored by local businesses and if we don't support them, they can't support our kids.
