IMPORTANT SAFETY INFORMATION FROM NICOR GAS

Every day, underground pipelines safely transport natural gas to homes and businesses throughout the area. Nicor Gas is responsible for the security and maintenance of pipelines in our service territory.

Call Before You Dig

Before digging around your property, state law requires you call **811** to have your utility lines professionally marked – for free! You must wait the required amount of time before you begin your project.

Pipeline markers indicate the presence of pipe and right-of-way. While they're not present in all areas, it's always best to call **811**. If right-of-way is adjacent to your property, it is your responsibility to ensure no new landscaping or physical structure interferes with access to the pipeline, and with our ability to keep it safe through routine monitoring and maintenance. Information about transmission pipelines operating in your community is available through the National Pipeline Mapping System (NPMS) and is available online at **npms.phmsa.dot.gov**.

Water Heater Safety

The U.S. Consumer Product Safety Commission urges all users to lower their water heaters to 120 degrees Fahrenheit.

Carbon Monoxide

Incomplete combustion of any fuel – produces carbon monoxide. Carbon monoxide is poisonous and has no odor, taste or color. Carbon monoxide detectors are helpful, but they are no substitute for using equipment safely. This includes having it inspected once a year by a certified contractor.

Appliance Safety

According to the Federal Emergency Management Agency:

- It's important that you have your furnace inspected by a qualified specialist.
- Be sure all furnace controls and emergency shutoffs are in proper working condition.
- Keep trash and other combustible material away from your air heating and water heating systems.

IF YOU SMELL GAS, ACT FAST.

Although natural gas pipeline incidents are uncommon, these tips will help you identify a possible leak and know what to do.

LOOK for blowing dirt or continued bubbling of standing water.

LISTEN for a hissing or roaring sound near a natural gas appliance or line.

SMELL for the distinctive rotten-egg scent of natural gas. Take action if you detect even a small amount of this odor.

LEAVE the area **IMMEDIATELY** if you detect a natural gas leak. Don't try to identify the source or stop the leak.

CALL Nicor Gas at **888.Nicor4U (642.6748)** or **911** once you are safely away from the possible leak site. Stay away from the area until a Nicor Gas representative or emergency personnel indicate it is safe to return.

REMEMBER while near a possible natural gas leak, do not touch or use anything that may cause a spark. This includes starting a car engine or using cell phones, lighters, matches, cigarettes, flashlights, light switches and landlines.

For more information, visit
nicorgas.com/safety
or call **888.Nicor4U (642.6748)**.

Ragweed Allergies Strangling You?

Learn more about how to control ragweed allergy symptoms

Tues., September 1st • 6:30–7:30 p.m.

Presented by: **Ronald Ragotzy, M.D., Immunotherapy/Allergy**

Held at the NorthPointe Health and Wellness Campus Community Education Room

Up to half of all cases of pollen-related allergic rhinitis in North America are caused by ragweed. Ragweed allergy symptoms appear in mid-August and fade with the first frost. Effective allergy medications are now available over the counter but the only way to eliminate allergies is with immunotherapy, which comes in three form—pills, shots and drops. Learn more about immunotherapy and the ways it can help at this seminar.

For an appointment with Dr. Ragotzy, please call ***(815) 525-4500.***
